Response to Office Action dated January 11, 2008

III. REMARKS

The examiner has required a modification to the specification to include sequence identifies and has required a new sequence listing in both hard copy and machine readable form.

Applicant is supplying herewith substitute pages 11 and 12 of the specification amended to include sequence identifiers. No other changes have been made and no new matter added.

Applicant traverses the requirement to provide the sequence listing in both hard copy and machine readable form. A modified sequence listing was provided to the patent office in this case on May 15, 2002. That filing has been deemed satisfactory throughout almost 6 years of prosecution. A hard copy of that listing is provided herewith.

No error in the filed sequence listing has been identified by the examiner in the Notice to Comply. A telephone call was placed to the examiner to obtain further information on what it was the examiner required but no contact was made.

Applicant believes that it is only the specification that needs amendment and has therefore not supplied a new sequence listing.

Should any unresolved issues remain, the Examiner is invited to call Applicants' attorney at the telephone number indicated below
